

Hosted Email Encryption

powered by Zix

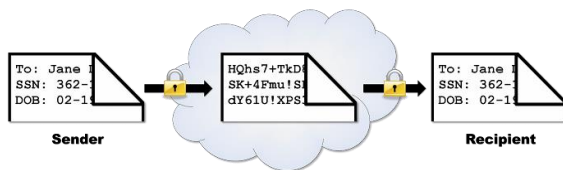

Another premium service from the Cloud email specialists, our Hosted Email Encryption is for business (including legal, healthcare and financial) as well as non-profits and governments. It provides secure and affordable email encryption anytime - anywhere:

- Complies with Federal and State privacy laws
- Automatic policy-based and manual encryption
- No special hardware or software to install
- Encrypt from any web-enabled device
- Seamlessly integrates with our hosted email and with your existing infrastructure, including Exchange, Outlook and Zimbra
- Branded Portal customized for your company

Minimize Risk

Protect your business and reputation, and minimize the risk of non-compliance fines and penalties. Secure outgoing email all the way through the Cloud with Greenview Data's

Hosted Email Encryption - Secure Through the Cloud

Email Encryption.

Alternate Products

We also offer an Encryption Gateway hardware appliance for easy setup and a virtual appliance that integrates with VMware-compatible environments. For those who need a desktop solution, an installed version (without policy scanning) is available.

Security

Our encryption service is powered by industry-leading Zix and a SOC3 certified, SOC2 accredited and PCI DSS 3.1 certified facility, for the ultimate protection of sensitive data.

Zix's encryption is trusted by millions of users in government, financial and medical and other business organizations. Customers include many hospitals and banks across the nation.

Reliability

Our email encryption is backed by an SLA with **99.99% guaranteed uptime** and implemented with real-time replication between data centers, so email encryption is available anytime - anywhere, from any device.

Compliance

Policy-based management lets you choose which sensitive data triggers automatic encryption:

- HIPAA Healthcare and Financial Information
- Credit Card and Social Security Numbers
- State Privacy Laws

Simple manual encryption insures that any outgoing email can be secured on its way to the recipient.

Immediate ROI

As a cloud-based service, Greenview Email Encryption requires no additional infrastructure, hardware or software. Simply use your existing web-enabled PCs, notebooks, netbooks, phones, etc. Best of all, **no key management** on either end!

Unlimited 24/7/365 Support

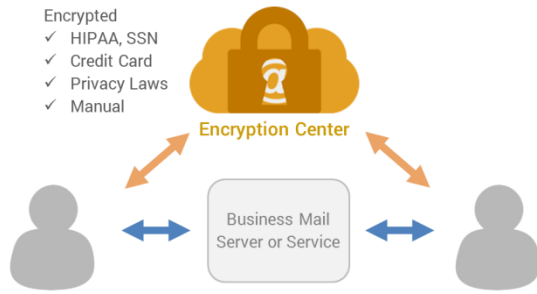

As with our other cloud email services, unlimited 24/7/365 live support is **included with hosted email encryption**. Call, chat or email us anytime.

Contact us anytime.

We're always here. 24/7/365.

Best Delivery Method

Anytime, Anywhere

With Greenview Data's Hosted Email Encryption, your outgoing email will be delivered using the Zix Best Method of Delivery.

- Emails sent to any of the millions of ZixGateway users are seamlessly encrypted and decrypted by the service.
- Emails sent to anyone else are accessible through a secure web portal using the same technology as online banking.

Simple Policy-Based Encryption

Set It and Forget It

Greenview Data's encryption is remarkably easy to setup and use. Policy setup is typically as simple as selecting your industry. Encryption rules are updated automatically to meet regulations. Users can also manually encrypt any email.

Either way, there is **no key management**, no software to install, and no training required. All outgoing emails and attachments are fully scanned and encrypted as needed. And the recipient can reply back encrypted!

- HIPAA
- Credit Cards
- Social Security
- Financial
- State Privacy Laws
