

Hosted Email Encryption

powered by Zix

Encrypting business email is critical for compliance and data security, whether in financial, healthcare, legal or other business or government.

Affordable

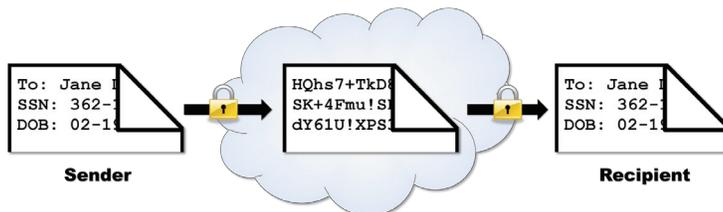

Email encryption has never been more affordable. With our hosted service, there is no additional hardware or software to buy, install or maintain.

Simple

Send encrypted email using your existing email system. It works with any web-enabled device and with all leading business email servers and services, like Office 365, Exchange, Outlook, Zimbra and webmail.

Compliant

Greenview's email encryption secures sensitive company and customer data through the cloud to help you comply with Federal and State Privacy laws.

Encrypted Email is secure
all the way through the Cloud

Policy-Based Encryption

The scanning engine automatically encrypts email with sensitive content, like:

- HIPAA Healthcare and Financial Information
- Credit Card and Social Security numbers
- State Privacy Laws

Users can also manually encrypt email simply by clicking a button or putting a word in the subject line. No key management!

Security and Privacy

Encrypted email is stored in the ZixData Center, which is SysTrust/SOC3 certified and SOC2 accredited in the areas of security, confidentiality, availability and integrity; and is PCI Level 1, DSS V2.0 certified.

Business and Reputation Protection

Protect sensitive corporate and customer information, and reduce the risk of compliance fines and penalties.

Hosted

Our hosted service works in the cloud, so you can send secure email to anyone from anywhere with 99.99% availability.

It's easy to use and fast to deploy. It works with any email application and integrates with Office 365, Exchange, Outlook and other email clients. Like our other hosted services, it also **includes our brilliant 24/7/365 live support.**

A portal branded with your corporate look is available.

Hardware or Virtual Gateway

If you prefer an on-premise gateway, a hardware appliance is available; as is a virtual appliance that integrates with VMware compatible environments.

Desktop Encryption

For those who need a desktop solution, an installed version is available. Does not include policy scanning.

Contact us anytime.

We're always here. 24/7/365.
