

## Business Email Hosting

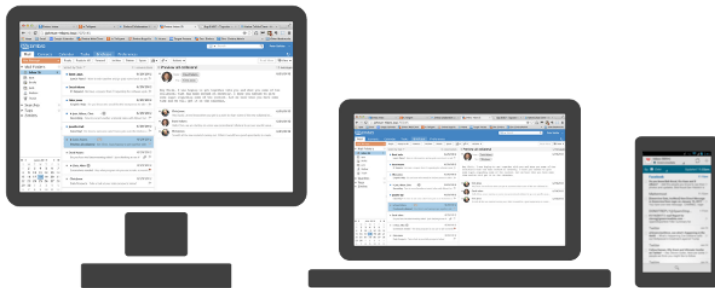

powered by Zimbra

Greenview Data specializes in secure cloud email services, like hosting, encryption, archiving and antispam.

Our Email Hosting provides secure business-level cloud email with collaboration and business continuity archiving. It's designed for legal, healthcare, financial and all other business, as well as non-profits and government agencies.

Greenview Email Hosting is an excellent replacement for Exchange or any hardware email appliance or hosted service, and it integrates seamlessly with our other hosted email products. Setup is easy and there is virtually no maintenance.

Standard, Business and Professional editions provide feature sets to cover all business needs. To provide the right level of service for each employee, you can mix and match editions within your account.

Anytime-Anywhere Secure Email, Calendar and Collaboration

### Contact us anytime.

We're always here. 24/7/365.

### Security

We built our email hosting on the rock-solid VMware platform and use fault-redundant geographically diverse data centers to store and archive your email.

To protect your business from email threats, we include premium spam filtering by **SpamStopsHere™**. Spam, phishing, viruses and other email threats are blocked in the cloud, before they can harm your business.

Also included is **RestorEmail™** 30-Day Continuity Archiving that lets you review and recover deleted email. Optional full archiving is available with policy-based retention periods and legal hold for eDiscovery.

Remote device management is also available to secure mobile devices against unauthorized access.

### Reliability

Our email hosting is backed by an SLA with **99.99% guaranteed uptime**, implemented with real-time replication between data centers, so your business email is available anytime - anywhere, from any device.

### Flexibility

Greenview Email Hosting can be used with mail clients that support POP, IMAP or SMTP (like Outlook) or webmail. All email hosting includes a full-featured Zimbra browser-based webmail interface and a Zimbra mobile webmail client.

### Immediate ROI

As a cloud-based service, Greenview Email Hosting requires no additional infrastructure, hardware or software. Simply use your existing web-enabled PCs, notebooks, netbooks, phones, etc.

There are no maintenance costs and no long-term commitments or licensing fees... just simple **monthly pricing and yearly discounts**.

### Unlimited 24/7/365 Support

As with our other hosted email services, 24/7 live support is **included with all email hosting packages**. Call, chat or email us anytime.
